## Commissioner's Foreword

The publication of this Annual Report on Performance for year 2021/22 of the Mauritius Prison Service motivates me as Commissioner of Prisons to embark on a mandate for transformational change and professionalization of the MPS. In line with this, some units and institution like the Prison Training School and the New Wing Prison have been ISO certified to meet international standards. Likewise, the Open Prison for Women and the Richelieu Open Prison have similarly embarked on their accreditation for being ISO certified and both are working effortlessly for that recognition and excellence.

This Annual Report on Performance offers an opportunity to review, not only the activities of the MPS during this period, but also to take stock and reflect on future challenges and perspective. The post Covid-19 era has changed the way we operate at the Mauritius Prison Service as we have had to adapt to the unprecedented changes. Admittedly, change is inevitable, but what makes a difference is that the MPS has been able to successfully manage Covid-19 inside its 12 penal institutions and adapt itself in order to meet the constantly evolving challenges and address the needs of a dynamic prison service.

Overall, the prison population appears to have increased as a result of changes in criminal justice policies and practice i.e the Road Traffic (Amendment) Act as well as the Judicial and Legal Provisions Act (2018) and not because of changes in the underlying prevalence or seriousness of offending behaviour. While explaining this increase is a complex task, recognised contributing factors appear to be a growth in the number of young people entering the criminal justice system; the stabilisation and increase in the number of women imprisoned, especially for drug-related crimes; and an increase in violent crimes. It is a legal requirement for MPS to take into its custody and care for all those who receive a sentence of imprisonment. That we have to receive fewer of them is a very welcome development. There are of course ancillary issues associated with reducing the prison population - that is, concomitant financial savings and potential resource transfer. We manage a highly diversified and heterogeneous population within prisons and the absolute number is but one aspect of the problem.

Public sector funding is undoubtedly under pressure in Mauritius and while we in MPS recognise the demands for resources emanating from the national budget, conceptualising the problem of funding as being remedied by a straightforward zero sum transaction between public sector accounts perhaps underestimates some of the nuances involved in custodial budgeting. At face value, prison population management should be easy – it's all about numbers and capacity and optimising occupancy rates. Well, not really. Dealing with prison population management takes a special skill to get all the sides properly aligned and it takes similar skill to structure our sub-populations across all the penal institutions in a safe, balanced and economically effective way which also maximises rehabilitative endeavour and

**ANNUAL REPORT ON PERFORMANCE FOR FINANCIAL YEAR

actively promotes opportunities, family contact and pro-social asset building to enhance community re-integration.

It is a constant challenge to MPS to manage efficiently the different categories of the population - remands, women, young people, sexual offenders, short-term prisoners and long-term and life sentence prisoners. It's not only a matter of internal composition; external policies and events also heavily impact on our activity. This approach has guided us towards a learning environment and a more holistic person-centred agenda for the management of young people in line with changes brought to the Children's Act 2020. The future diversified custodial arrangements for women obviously has a huge impact on how we approach their safe custody and deliver the rehabilitative processes required for their purposeful return to the community.

We need to re-calibrate by recognising that those in our custodial care are indeed individuals; yes, with their problems and issues, but also with their own legitimate hopes and aspirations. None of us likes to be defined or described by our weaknesses or faults - those who are sent to our care are no different. We need to help them find the right solutions for their own personal circumstances by promoting individual agency and self-efficacy to realise full potential. Our staffs, working in prison and now extending into the community, are uniquely placed to lead by example and to motivate and constructively challenge those in our care. Each is an integral part of the other's daily life and this proximity and interaction provides countless opportunities for pro-social modelling, positive behavioural reinforcement, social skills development, restorative practices and conflict resolution as well as it also provides opportunities for humane acts of kindness.

Jaganaden RUNGADOO  
Acting Commissioner of Prisons

## Mission, Vision, Goals and Objectives

### **Mission**

We serve the society by keeping detainees in a safe, humane custody and help prepare them for a useful life in society.

### **Vision**

A Safer Mauritius through best correctional practice.

### **Our goals**

Keep detainees in a safe custody.

Maintain order, control, discipline and safe environment.

Provide decent conditions for detainees and meet their needs, including medical care, advice on and help with personal problems.

Provide positive regimes which help detainees to address their offending behaviour and prepare them to live a full and responsible life.

Help towards rehabilitation of detainees. Provide a delivery of prison services using resources provided by Parliament with maximum efficiency.

In meeting these goals, we co-operate closely with other criminal justice agencies and contribute to the effectiveness and development of the criminal justice system as a whole.

To monitor all statutory to intramural sentences.

### **Our Objectives**

To provide a safe and healthy environment, that is conducive to the rehabilitation and spiritual enhancement as well as vocational training of the detainees.

To facilitate and safeguard ways and means for the detainees' contact with outside world, i.e. spouse, children, parents and next of kin.

To provide the necessary structures that will be beneficial for all detainees in terms of education and vocational training.

To apprise and sensitize the detainees on the ill effects of substances abuse and to empower them so that they may lead a drug-free life.

To provide the detainees with all the required structures for their mental and physical development through sports and games and to continuously upgrade and rethink the existing physical structures of the prison so that they may be congruent with a healthy and peaceful environment.

## General Overview

The Mauritius Prisons Service comprises of **11 penal institutions** including one in Rodrigues (*the 10<sup>th</sup> District of Mauritius*). Correctional Youth Centres and Rehabilitation centres also falls under the jurisdiction of the Mauritius Prison Service.

### Central Prison Beau Bassin (BBP)

The Central Prison Beau Bassin came into operation on the 1<sup>st</sup> May 1887. It is a maximum security and has a current accommodation capacity of 1034 detainees. This prison houses mostly remand detainees.

All detainees located at this institution benefit from educational, vocational, recreational and spiritual facilities.

Nevertheless, it has been noted that there is a significant percentage of the prison population who are affected by substance abuse and drug related diseases. As such, rehabilitation of drug abusers and health care assumed new scope of reformation.

The detainees are also provided Methadone Substitution Therapy and Antiretroviral Treatment.

### New Wing Prison (NWP)

The New Wing Prison is a medium security institution. Situated at the back of Beau Basin prison, the said institution came into operation on 6<sup>th</sup> March 2003 and since April 2006; it started accommodating detainees selected to perform outdoor labour.

This institution accommodates mostly remand detainees and has a maximum bed capacity for 357 detainees.

All newly detainees (*Remanded / Convicted by Court*) are admitted at New Wing Prison to undergo the induction process which consists of prison life, the prison rules, the daily regime, their rights and privileges responsibilities and how to start preparing themselves to reintegrate the society.

JULY 2021 - JUNE 2022**

**Petit Verger Prison (PVP)**

The Petit Verger Prison (PVP), a medium security prison is located at Pointe Aux Sables found in the district of Black River. The institution came into operation on 16<sup>th</sup> February 1982 and has an accommodation capacity of 328 detainees.

Convicted detainees approaching their date of release with no other cases and of good behaviour/conduct are transferred to this institution except those classified as high risk or who have had a history of escape.

Detainees housed at PVP are provided training in Gardening, Pastry, Food production, Livestock Rearing, Sheet Metal Works, Block Making, Builders and Constructions, Tailoring and Carpentry. The Templin Training Centre found at the institution dispenses courses under the aegis of Mauritius Institute of Training and Development (MITD) in welding & metal fabrication and wood trade.

**Richelieu Open Prison (ROP)**

Richelieu Open Prison came into operation on the 02<sup>nd</sup> October 1958. It is characterized by the absence of physical structures and by a system based on self-discipline and on a sense of responsibility which the detainees show towards the group in which they live.

Offenders whether committed for long term and reaching the end of their sentence or short term

Imprisonment, are eligible for the transfer to the institution subject to a positive response from them in other institution.

However, priority is given to first time offenders (*those admitted in prison for the first time*).

Accommodation is available for 166 detainees who live in four dormitories. The Open condition of the institution allows detainees the privilege of having contact visit with their relatives.

Detainees are provided training in agricultural work and animal rearing as well as vocational work and industrial activities has proved to be beneficial towards their eventual release. The multi-skilling programme, be it, in vegetable production, animal husbandry, shoemaking, printing, layers and metal workshop pave the way for the rehabilitation of detainees. Mauritius Prison Service is at present 100% self-sufficient in eggs due to egg production in the institution.

## **E-PRISON**

The Mauritius Prisons Service has implemented e-Prison System in all the twelve (12) Penal Institutions through an Intranet System. Users access the system through their personal usernames and password created by the MPS IT Unit.

In June 2022, approval from the Prime Minister's Office has been granted for the extension of the e-Prison System to Rodrigues Prison through Mars Fibre Optic Cable. Following the above, ASP V. Pertaub, Officer-in-charge of ICT of the MPS went to Rodrigues for the installation and configuration of the ePrison System at the Rodrigues Prison Administration.

An Intranet system including the Data Cabinet installed at the Administrative Block of the Institutions and the SHDSL Lines implemented by the Mauritius Telecom of Rodrigues has been tested. The Main Switch set up for ePrison System has been configured in collaboration of Mauritius Telecom and MPS IT unit. After the said configuration, the e-Prison System has been tested successfully.

**WAY FORWARD:** A Team from the MPS IT unit shall move for the hands-on-training for all Staffs of Rodrigues Prison by end of October 2022 and official launching of the e-Prison System has been planned for the same period.

After the hands-on-training, it is also planned to input information pertaining to all remand and convicted detainees presently detained at the Institutions.

It is also planned for designing Rodrigues Prison Website in order to market the various activities held at the said Prison including the statistics.

Bail and Remand Court which is presently held through Skype between Rodrigues Courts and Rodrigues Prison shall be implemented using the same system as at the Mauritius Prisons Service. The services of the MPS IT Team shall be solicited for the successful implementation of the BRC for Rodrigues Prison.

## Financial Performance

### Financial Highlights

#### ❖ Expenditure

In accordance with Budget Estimates 2021-2022, the Mauritius Prison Service had 1 Vote under its control namely 2-10.

An amount of Rs 864,000,000.00 was allocated under Vote 2-10 for the financial year 2021-2022 for both recurrent and capital expenditure.

The chart on page 41 shows a summary of the total recurrent expenditure incurred by the Mauritius Prison Service under Vote 2-10.

#### ❖ Financial Highlights

There has been an increase in respect of Compensation of employees in the Financial Year 2021/2022 by an amount of approximately Rs 34,352,367.61 compared to actual expenditure in the last financial year. This is due to the implementation of PRB Report 2021.

Goods and Services have increased by an amount of Rs 19,009,412.22 from Rs 146,225,700 to Rs 165,235,112.22. This is due to constant rises in price of goods and services post the COVID-19 crisis and the expenses incurred due to the conversion of Petit Verger Prison into a Covid-19 Centre.

#### ❖ Revenue

A total amount of Rs 10,537,375.08 for Prison Services has been collected in the financial year 2021/2022 with an increase in sale of goods and services by an amount of Rs 3,486,217.20 compared to the actual revenue in the last financial year.

#### ❖ General observation

Activities, projects and productions have resumed to normal after Covid-19 crisis. A rise in revenue is due to the sale of scrap materials through an auction sales held in March 2022. Also note that revenue could have been more consequential if Kermesse 2021 was held normally.

**STRATEGIC DIRECTION**

The Strategic Plan 2013-2023 was worked out with the collaboration of the United Nations Office on Drugs and Crime (UNODC). It was developed as it provided an insight for prisons to introduce better and more modern practices. Taking into consideration the different constraints and challenges facing the MPS, the aim of this Strategic Plan has been to devise ways and means to improve prison performances over time. Its purpose is to introduce best correctional practice that fit the Mauritian context. The plan is a road map that points the direction and sets target to reduce recidivism. Six main areas of reform were identified and were categorized as here-under:

As at now, for the successful implementation of the plan, it is imperative to have effective teamwork as well as internal and external partnerships. To this end, two goals of the six main pillars have already been completed namely the Strategic Planning & Research Unit and the Operationalising of the Eastern High Security Prison. Each pillar is being monitored by a team of prison staff under the direct responsibility of a Deputy Commissioner of Prisons.

### ❖ Strategic Planning and Research Unit

The Strategic Planning and Research Unit which was established in 2013 as one of the pillars of the Strategic Plan 2013-2023 and which is headed by an Assistant Commissioner of Prisons, is responsible to conduct research and analyse data for emerging trends in prisons across the world. It also provides accurate advice to senior management team to better support decision making for the planning of infrastructure, services and the formulation of policy proposals. It also organizes meetings with internal and external stakeholders and technical people to assist in the implementation of projects in the different units. In order to be proactive in the execution of its challenging duties, the MPS is bound to develop mechanisms to ensure that resources are developed optimally. The Planning Unit has the responsibility to constantly monitor, supervise and report to Senior Management matters pertaining to the effective and efficient use of resources at the MPS. It has a good documentation system to record all progress of work pertaining to different institutions.

### ❖ Integrated Detainee Management

On the 31<sup>st</sup> of December 2020, the Mauritius Prisons Service accommodated 2507 adult detainees (*Males and Females including Foreigners*) in Mauritius and 37 detainees (*Males and Females*) in Rodrigues. The coming into operation of Eastern High Security Prison in 2014 has provided modern prison accommodation and an opportunity to introduce improved detainee management systems as well as review and rationalize the utilization of the prisons facilities. The management of detainees has remained basically unchanged with prison officers largely performing a traditional “turnkey” role. This is not to underestimate some important rehabilitative services and recent innovations particularly the development of a new induction system and the Enhanced Earning Scheme. The Mauritius Prisons Service has long had the aim of rehabilitating detainees and has a number of specialist staff to provide a range of education, training skills, welfare services, along with non-government organizations that provide rehabilitative programmes and service. However, the great majority of prison officers’ roles is focused on security and supervision and is not engaged in the rehabilitative aims of imprisonment. The aim is to instil a positive respectful relationship between staff and detainees using an integrated system of managing detainees that focuses upon protecting the community by reducing re-offending. This will be achieved by developing a training curriculum for prison officers to support the implementation of an Integrated Detainee Management System that addresses all the identified challenges by incorporating the following key components: (1) First night strategy (2) Reception and induction (3) Risk Assessment Tool (4) Programmes (5) Case Management (6) Unit Management (7) Sentence and Release Planning.

## ❖ Rehabilitation and Resettlement

Cognitive Behavioural Programmes should become the key focus for reducing the rate of re-offending. Most detainees have a low educational and employment background and many have poor physical and mental health. There is a high incidence of drug abuse and HIV and other infections. It is obvious that many of these detainees come from the most vulnerable group in society. There are many challenges being faced to reduce re-offending but in the long run, the following measures are being taken into consideration:

- To create more space for activities and workshops with expanded vocational opportunities in tune with demand on the contemporary work market thereby enhancing detainee's employability upon release;
- To establish a pre-release plan for each detainee; and
- To establish a comprehensive and coordinated resettlement support services through a coordinating body involving Government and Non-Government Organizations (NGOs).

Looking to the future, and the implementation of the Mauritius Prisons Service Ten-year Strategic Plan 2013-2023, especially the Rehabilitation and Resettlement Pillar, partners will have to ensure that all opportunities are seized to deliver positive results for detainees. Practical, intelligent and innovative approaches to managing the complex needs of detainees will help ensure that the community is protected, crime is reduced and vulnerable people, especially women, are not victimized in society.

## ❖ Improved Security

Security and safety are the primary concerns of prison systems. Thus, prison staff must constantly be on alert to calculate and minimize a multitude of potential risks to security. These include but are not limited to the risks of: escape; detainee violence and bullying; self-harm and suicide; illicit drug use, infection, and many more. In broad terms, security takes three forms:

- **Physical security** includes architecture of the prison buildings, the strength of the walls of those buildings, the bars on the windows, the door of the accommodation units, the specifications of the perimeter walls and fences, watchtowers and so on.
- **Procedural security** relates to security processes and procedures which have to be followed such as searching, counting and supervision and control.
- **Dynamic security** is a concept and a working method by which staffs prioritise the creation and maintenance of everyday communication and interaction with detainees based on high professional ethics. It ensures that there is sufficient purposeful and meaningful activity to occupy detainees.

When physical and procedural security is at their highest level they are extremely costly to run and might be interpreted as being oppressive and inhumane for detainees. If security and safety are absent, detainees can quickly become violent and dangerous. Consequently, it is

important to have a range of prisons that have been constructed and rated to varying levels of security. In Mauritius as in most countries, prisons are designed to four levels of physical security:

- (i) High security; (ii) Maximum security; (iii) Medium security; and (iv) Minimum security (open condition). Ideally, detainees should be individually assessed for the level of risk they pose and be matched and placed into prisons with an appropriate security rating.

To this end, the following have been taken into consideration to improve security: -

- (i) The construction of Melrose Prison has provided a respite to overcrowding.
- (ii) Regular security audits (that build upon the security audits previously sponsored by UNODC) in all prisons will help to reduce the security risk arising from the deterioration of the prison conditions.
- (iii) A search strategy to detect prohibited articles such as mobile telephones and drugs by making increased use of new technologies.
- (iv) Trial of security classification tools for detainees by making use of modern techniques to ensure that detainees are classified to the lowest level of security appropriate to their circumstances.
- (v) Prison security ratings – to ensure that each prison is appropriately rated in terms of its security as high, maximum, medium or minimum security.
- (vi) Standard Operating Procedures (SOP) should be developed for the proper management of prisons.

### **❖ Operationalising Eastern High Security Prison**

The Eastern High Security Prison was inaugurated on 20<sup>th</sup> of March 2014 and became into operation on the 27<sup>th</sup> of March 2014 and it has reached its cruising speed as a fully functional high security prison. It consists of three cell blocks, five dormitory blocks, high security special units, a geriatric block, educational facilities, a segregation dormitory block, works complex, staff facilities, administrative block, religious facilities, and kitchen and service yards. It has the capacity to accommodate 750 to 922 male detainees especially those undergoing long sentences.

### **❖ Capacity Building**

Capacity Building is an important feature in any organization. The quality of service delivered depends on how human resources are recruited, managed and trained. In order to achieve the mission of the Mauritius Prisons Service, human resources are being managed efficiently and responsibly and attention given to building capacity of staff. To address this problem, the following **has been taken** into consideration:

**ANNUAL REPORT ON PERFORMANCE FOR FINANCIAL YEAR  
JULY 2021 - JUNE 2022**

- (i) Senior management capacity to ensure that leadership and competent management experience is available to provide future leadership to the organization.
- (ii) Mauritius Prisons Service training curricula do not meet adequate best correctional practices. The Prison Training School presently offers basic training to new recruits, in-service refresher course, Senior Officer Cadet training and qualifying course for promotion to Assistant Superintendent. The existing curricula do not include such modules as interpersonal skills, and other skills relevant to modern Unit Management, Case Management and Sentence Planning, etc. However the assistance of Mauritius Civil Service College is sought for the training of officers at all ranks.
- (iii) For other employees to develop their skills and competencies and to instruct individuals about the prison system, standards and expectations, codes of conduct, and reporting methods, it is necessary to put in place a comprehensive training and development system. A skills-based and competency-based system is the most effective approach to staff development and this training and development can be provided most effectively internally.
- (iv) Human resources training should be ongoing and consider the need to re-train personnel when new legislation, policies, procedures and processes are being implemented. The training school must be well resourced. It should be supported by specialist staff with specific skills as trainers and educators.

❖ **Evaluation of Strategy**

Periodic evaluations of strategies, tactics, and action programs are being carried out to assess success of the strategic planning process. It is important to measure performance at least annually (but preferably more often), to evaluate the effect of specific actions on long-term results and on the organization's vision and mission. The organization measures current performance against previously set expectations, and consider any changes or events that may have impacted the desired course of actions.

❖ **Review of the Strategic Plan**

After assessing the progress of the strategic planning process, the prison system reviews the strategic plan, make necessary changes, and adjust its course based on these evaluations. The revised plan takes into consideration emergent strategies, and changes affecting the organization's intended course.

**STRATEGIC PLANNING AND RESEARCH UNIT**

The Strategic Planning and Research Unit which has its office at the Orchids House and which is under the charge of an Assistant Commissioner of Prison was operational in 2013 under the first pillar of our ten-year Strategic Plan 2013-2023. The Plan was developed by a dedicated team of officers under the close supervision of a UNODC Consultant and it focused on the following areas of concern:

1. Setting up of a Strategic Planning and Research Unit to assist management in policy decisions and project formulations and to address relevant legislative reform
2. Integrated Detainee Management
3. Setting-up of a new high security prison to address the problem of overcrowding in our prisons and the implementation of new rehabilitation methods
4. Rehabilitation and Resettlement of detainees
5. Capacity building
6. Improved Security of prisons

The purpose of the Strategic Planning and Research Unit is to assist management in decision-making by providing a good information system to support an effective prison management system which benchmarks on world best practices. Issues related to legislation, human rights, modern risk management, modern actuarial risk and classification models, credible alternatives to imprisonment, modern concepts of rehabilitation, negative impact of short sentences on cost of imprisonment, effectiveness of the Parole System, long period of remand, high rate of re-offending are some of the subjects of concern for the Strategic Planning and Research Unit.

Qualified Officers posted at the Strategic Planning and Research Unit are expected to conduct research and analyze quantitative and qualitative data for emerging trends in prison management and related social sciences and provide accurate advice to senior management team to better support decision-making for the planning of infrastructure, services and formulation of policy proposals across the criminal justice system. The e-prison system shall be considered as an integral part of the Strategic Planning and Research Unit as without a good management information system planning and research will be impossible.

**Projects undertaken at the Planning Unit since its establishment are listed below:**

1. Implementation of a Quality Management System ISO 9001:2008 at New Wing Prison Induction Unit in 2013 and maintenance of same as per legal requirement.
2. Implementation of an e-prison system with the collaboration of the Government of India in 2013. Phase 2 of the project is now at the implementation stage.
3. # Procurement and Supply Section

---

The Procurement and Supply section has a major role within the supply chain management while getting the goods required by the Mauritius Prison Service while ensuring Accountability, Competitive Supply, Consistency, Effectiveness, Value for Money, Fair-Dealing, Integration and Integrity.

The main achievement of the Procurement and Supply section for the fiscal Financial Year 2021-2022 are as follows:

## **1. Acquisition of Vehicles**

- a. During the fiscal year Four (04) vehicles were procured and were distributed to Richelieu Open Prison, Grand River North West Remand Prison, Eastern High Security Prison and Beau-Bassin Prison. The vehicles were procured to facilitate the day to day running of Penal Institutions.

## **2. Auction Sales**

- a. Several items such as Used vehicles, Assorted equipment, Spare Parts, Scrap Metals etc., which were lying dormant in different institutions were sold to public through an Auction Sale which was held in February 2022 and around Rs. 3.5 M was recovered from that sale.

## **3. Drone**

- a. Security is a major aspect of the Prison Department. In order to enhance the security environment of the Prison Department a drone was procured for that purpose.

## **4. Cell Phone Jammers**

- a. Prison inmates are forbidden from possessing mobile phones for communication with the outside world. The use of mobile phone inside the Prison's premises has largely affected the security issues of the Prison Department. The procurement of the cell phone jammers has helped in controlling the cell phone activity in the prison areas. It has serves the purpose of blocking unauthorized calls and allowing authorized communication activities inside the prison.
